

# Junho Lee

yax3ad@virginia.edu | (703) 477-9100 | Fairfax, VA | leejunho.dev

---

## EDUCATION

---

### University of Virginia

*BA, Computer Science and minor in Statistics*

- Relevant Coursework: Data Structures and Algorithms 2, Computer Systems and Organization 2
- 4.0 GPA, Dean's List of Distinguished Students Fall 2022

**Expected May 2025**

*Charlottesville, VA*

### Thomas Jefferson High School for Science and Technology

*High School, 4.502 GPA*

**June 2022**

*Alexandria, VA*

## WORK EXPERIENCE

---

### UIUC+ Summer Research Program

*Research Assistant*

**May. 2023 – Present**

*Remote*

- Collaboratively working on expanding software testing
- Reviewing previous works and research
- Participating in weekly meetings and communicating through Slack

### UVA CS 2120: Discrete Mathematics and Theory 1

*Teaching Assistant*

**Jan. 2023 – Present**

*Charlottesville, VA*

- Holding weekly office hours to guide students through technical problems
- Participating in weekly staff meetings to write/grade quiz questions and discuss logistics
- Assisting instructor during lectures and answering students' questions

## PROJECTS

---

### Light CMS

**May. 2023 – Present**

- Creating a headless, serverless content management system for website content on AWS
- Set up a DynamoDB database and a static site on Amazon S3 and CloudFront
- Working on making Node.js REST APIs for content on Amazon Lambda + API Gateway
- Working on programmatically authenticating from Amazon Cognito
- Setting up services under custom subdomains (e.g. api.leejunho.dev, auth.leejunho.dev)

### DataProfiler (Open-source Contributions)

**May. 2023 – Present**

- Wrote 10+ merged pull requests to repository
- Fixed project's Python type checking configuration and resolved new type errors
- Researched solutions from other projects and discussed options with maintainers on GitHub

### ResuMatch (HooHacks 2023)

**Mar. 2023**

- Used an API to query and process job data from LinkedIn and find matches to PDF resume
- Wrote a Flask backend with REST API, combining team members' individual contributions
- Presented the project to judges with live demo

### Wikipedia iOS App (Open-source Contributions)

**Dec. 2022 – Jan. 2023**

- Opened pull requests for bug fixes and features which were approved and merged by maintainers
- Fixed bugs based on user reports, in large Swift/Objective-C codebase with little documentation

## SKILLS

---

Python, JavaScript, React.js, HTML, CSS, Java, C++, AWS, Bash, Swift, R, Git
